

Applied Data Analyses for CBM Exploration and Production

30 January 2012-Jakarta/Venue: Hotel Parklane, Casablanca

Course Leader: Dr Alan Bayrak

Many CBM projects fail due to poor planning and management of geological and field data for evaluation of the CBM prospects. This course shows delegates how to analyse the CBM data for prospectivity analysis. Featuring:

- Develop a database for geological model
- How to examine historical data
- How to assess wireline logs for CBM analysis
- How to analyse CBM core exploration data
- Coal reservoir analysis and evaluation
- Risk analysis for CBM prospect analysis

Course outcomes:

- Understanding of a broad range of CBM prospectivity analysis
- Knowledge of CBM Data Management
- Ability to assess future CBM data for own use, incorporating elements from the course.

Registration: Please e-mail to info@csgexploration.com "Registration Form" and course details will be sent to you by e-mail.
