CSGEPs has been awarded to Manage the VMA-EMP's Exploration Program in Kalimantan, Indonesia

EMP has planned to accelerate its CBM Exploration Program in Sangatta and Tabulako Blocks targeting a 24 well program in 2012-2013. CSGEPs has been awarded to provide technical expertise for EMP's CBM exploration program. This extensive drilling program will provide very important data for commerciality of the areas. The data obtained from the drilling will be used for further step out core and exploration wells, and pilot well locations.

Bakrie Tower-EMP Headquarter.
