UNDERGROUND COAL GASIFICATION (UCG) PROJECTS

Coal Seam Gas Exploration & Production Services has been providing technical expertise to a number of companies worldwide for underground coal gasification (UCG) projects. Our expertise in UCG projects is as follows:

- Project Development and market analysis
- Advance analysis of coal data
- Coal Resource and Prospect Assessment for UCG
- Geological and structural analysis for UCG development
- Drilling and sampling program for UCG

Recently Coal Seam Gas Exploration & Production Services has been commissioned to complete a UCG Project Evaluation and Coal Resource Assessment Project by Carbon Energy. Previously we had completed a successful UCG assessment and market analysis project for Carbon Energy.

Coal Seam Gas Exploration and Production Services is in process of developing some UCG projects in Indonesia and Europe.
